

## MATERIAL DETECTIVE

What you need:

- small samples of materials and fabrics; wool, synthetic, cotton, fleece, sheepskin.
- Magnifying glass.
- Blind fold.

Method

- Touch and feel the different materials.
- Use the magnifying glass to examine the different fibres.
- Answer the questions:
  - Which feels softer?
  - Which feels warmer?
  - Which feels natural?

Time to TEST each other!

- Tie the blind fold around your partner's eyes.
- Pass the samples to the blindfolded participant.
- The blindfolded person must say what type of material they are holding.
- Score each other.
